

Track Mee

Secure Your Corporate Assets

Trackmee is a cutting-edge Anti-Theft Device Tracker tailored for businesses to safeguard their valuable electronic assets, including smartphones, laptops, tablets, and other devices. With its robust security features and enterprise-focused capabilities, Trackmee is the ultimate solution for ensuring the safety and integrity of your corporate devices.

Key Features

Real-Time Location Tracking

- » Pinpoint the exact location of company devices using GPS, Wi-Fi, or cellular data for real-time asset visibility.

Remote Lock and Wipe

- » Protect sensitive corporate data by locking devices or erasing information remotely in the event of theft or loss.

Alarm Activation

- » Enable a loud alarm remotely to quickly recover misplaced or stolen devices, even if they are on silent mode.

Device Monitoring

- » Track device usage, log unauthorized access attempts, and gain insights into security breaches with detailed activity reports.

Geofencing for Asset Security

- » Receive instant alerts when devices move beyond designated zones, ensuring proactive protection of your corporate assets.

Theft Deterrence Technology

- » Capture evidence with activated cameras and microphones, deterring theft and aiding recovery efforts.

Centralized Multi-Device Management

- » Centralized dashboard for monitoring multiple devices under a single account.

Folder Lock Protection

- » Safeguard sensitive files and folders with advanced encryption and password protection, ensuring only authorized users can access critical data.

Benefits of Track Mee

Enhanced Security

Protect sensitive corporate data and minimize the risk of breaches.

Improved Recovery Rates

Locate and recover lost or stolen devices efficiently.

Operational Efficiency

Simplify device management with an intuitive dashboard and automated alerts.

Cost Optimization

Reduce financial and data losses with robust protection measures.

Compliance Assurance

Align with industry security standards and regulations.
